

ARISTOS ALFRESCO

MASTERS IN OUTDOOR LIVING

The Outdoor Kitchen Collection

Modular stainless steel kitchens, handleless fronts, sintered stone worktops and professional outdoor appliances - designed around the way you cook and entertain.

ENGINEERING & DESIGN

The modular system

Every Aristos Alfresco kitchen is assembled from precision-made modules, so each design fits the space exactly and is built to last outdoors.

Stainless steel carcass

Every cabinet body is 1.0 mm 304-grade stainless steel as standard - weatherproof, hygienic and rigid.

Handleless fronts

Clean, uninterrupted door and drawer fronts with no handles, in painted, wood-grain or sintered stone finishes.

Level and continuous

All cabinets and appliances align to one worktop line and one continuous plinth, with no visible gaps.

Sintered stone worktops

Continuous worktops in 20 mm or 40 mm, finishing flush at the ends of the built run, with matching end panels.

Integrated appliances

Built-in and freestanding grills, Kamado smokers, pizza ovens and refrigeration designed into the run.

Architectural lighting

Optional LED lighting under the worktop edge and along the plinth, running end to end.

LAYOUTS

Straight line

A single continuous run against a wall or fence. The simplest and most compact layout.

L-shape

Two runs meeting at a 90 degree corner. Gives a natural cooking zone and prep zone.

U-shape

Three runs wrapping around the cook. Maximum worktop and storage.

Island

A freestanding run serviced from one side only, with a finished back panel and an optional 300 mm worktop overhang for bar seating.

MODULAR CABINETS

Cabinets & storage

Stainless steel cabinets for storage, preparation, sinks, waste and corners - plus half-height bays that set a Kamado at the right cooking height.

FINISHING TOUCHES

Lighting & planning

Under-worktop LED

A warm-white LED line beneath the worktop edge, running the full built length end to end and pausing either side of a Kamado bay.

Plinth LED

A continuous LED line along the plinth for a floating effect and safe night-time footing.

Island back lighting

Islands can be lit beneath the rear worktop overhang to light bar seating.

Measuring your space

Give us the maximum available length of each run. Your kitchen is built from modules to fit within it, including 20 or 40 mm end panels.

Cut-outs

Sinks, built-in grills and client-supplied appliances are cut precisely into the stone. Freestanding appliances sit under one continuous worktop.

Designing & ordering

Design your kitchen step by step in the online builder, then download your specification and order form with all finish codes.

DESIGN YOURS
